IN THE SPECIFICATION

Please amend the first paragraph (lines 1-7) on page 16 as follows:

Figure 5 shows one flowchart for a method 500 of inverting transferred data. In Figure 5, a set of executable instructions reside on a computer readable medium [[500]]. Of course as will be readily apparent to those skilled in the art, the executable instructions need not reside on any single computer readable medium, as it can be that the instructions are housed on multiple computer readable media and operable to be logically associated and execute as a cohesive unit of instructions. Initially, the executable instructions acquires a data stream in step 501.
